Pin Pounder EC Installation System

Tough, Dependable, and Easy to Use!

Pin Pounder EC Installation System

The North American Green Pin Pounder Installation System consists of a simple, easy to use patented-pending installation tool and specially designed Circle Top pins and V-Top staples. The Pin Pounder assists in the installation of pins or staples by eliminating the need for back-breaking hammering or lugging around a heavy staple gun. Simply place the pin or staple on the magnetic head and punch it into the ground. The fastener easily releases from the Pin Pounder in one quick motion.

The versatile Pin Pounder can be used with any rolled erosion control product, sod, or geotextile fabrics. Pin Pounder requires little to no maintenance, and will never jam like some staple guns.

North American Green's new 6-inch Circle Top pins and V-Top wire staples are designed for best results with the Pin Pounder. Made from strong 11 gauge wire, the Circle Top pins and V-Top staples are designed for increased stability during installation. The Circle Top pins are also banded in easy to handle bundles of ten that simplify use with the Pin Pounder. V-Top wire staples have two legs for increased holding power in loose soils and areas subject to frost heave.

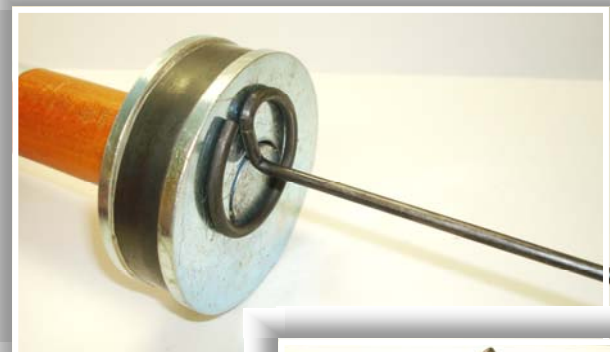

Pin Pounder EC Installation system is a cost effective tool to speed rolled erosion control product installations, and reduce overall installation costs.

Advantages of North American Green Pin Pounder EC Installation System

- Fast, effective Pin/Staple installation in all soils, including hard, heavy clays
- Can be easily used on slopes too steep for staple guns
- Simple, inexpensive alternative to other staple installation tools
- Non-mechanical, never worry about jams or maintenance
- Light-weight design reduces user fatigue
- Eliminates back-breaking hammer action
- Textured rubber grip for all-day comfort
- Stream-lined design for easy storage
- Strong magnetic head easily holds staples upright

Pin Pounder's cushioned grip is easy on the hands, while its strong magnetic head securely holds pins or staples and allows for installation in one simple punch.

New 6-inch V-Top staples and Circle Top pins are specially designed for use with the Pin Pounder. Both fasteners provide a flat surface to sit flush on the Pin Pounder magnetic head and enables them to be easily driven into nearly any soil type without bending.

Pin Pounder EC Installation System

Pin Pounder EC Installation System Specifications

Pin Pounder Installation Tool

Handle Length	38 in (0.97 m)
Handle Diameter	1.0 in (2.54 cm)
Magnetic Head Diameter	2.0 in (5 cm)
Magnetic Head Thickness	1.0 in (2.54 cm)
Texture Grip	9.0 in (23 cm)
Total Pin Pounder Weight	2.0 lbs (0.91 kg)

Circle Top Pin

Wire Gauge	11 gauge wire
Pin Length	6.0 in (15.2 cm)
Circle Top Diameter	1.5 in (3.8 cm)
Packaged	1000 per box

V-Top Wire Staple

Wire Gauge	11 gauge wire
Staple Leg Length	6.0 in (15.2 cm)
Bent V Length	1.0 in (2.54 cm)
Packaged	1000 per box
